FIG. 15C

FIG. 16A is a block diagram of a system architecture for a network security system. The system includes a GATEWAY (1610) and a CONTROLLER (640). The GATEWAY (1610) contains a GATEWAY Daemon (1612) and an IPsec component (1614). The CONTROLLER (640) contains a NOC Daemon (642) and an ADMINISTRATIVE SERVER (616). The ADMINISTRATIVE SERVER (616) contains a MAP INFO component (618). A Tunnel Interface (1630) is located between the GATEWAY (1610) and the CONTROLLER (640). A TCP Tunnel (1620) and an IPsec Tunnel (1622) are shown connecting the GATEWAY (1610) to the CONTROLLER (640). A legend indicates that dashed lines represent the Control Path (Thread) and solid lines represent the Data Path.
